ABOUT ME

To build a rewarding career as a Frontend Developer, specializing in React.js, Next.js, JavaScript, and TypeScript, with a focus on developing responsive and user-friendly web applications. Seeking opportunities to contribute to modern web application projects while continuously strengthening my technical and problem-solving skills.

PROFILE SUMMARY

- Frontend Developer with **3+ years of overall experience** in developing responsive and user-friendly web applications.
- Hands-on experience with **React.js, Next.js, JavaScript, TypeScript, HTML5, and CSS3**.
- Experienced in working on **fintech and business applications**, including payment dashboard and tax-related applications.
- Looking to build a strong career in Frontend Development and contribute to **React.js and modern web application projects** while continuously strengthening technical and problem-solving skills.

WORK EXPERIENCE

Aug'22–May'26 | Frontend Developer | Open Financial Technologies, Bengaluru
Key Result Areas:

- Contributed to the development and maintenance of responsive web applications using **React.js** and **Next.js** for fintech and business-focused products.
- Worked on a **Payment Dashboard**, developing reusable React components for dashboard screens, forms, tables, data views, and user interactions.
- Integrated **REST APIs** to fetch and display payment-related data and implemented appropriate loading, error, and success states.
- Worked on **Optotax Notices**, a web application developed using **Next.js** and **React.js**, implementing responsive UI screens and reusable components based on business requirements.
- Built pixel-perfect, fully responsive UIs using **Tailwind CSS, SCSS, and Figma** collaboration, and delivered high-performance animations with **CSS** and **GSAP** to boost user engagement.
- Worked on a marketing website using **SvelteKit**, developing reusable and responsive UI components for a modern web experience.
- Applied **SEO best practices**, including semantic HTML and meta optimization, while ensuring cross-browser compatibility and following **WCAG accessibility standards**.
- Collaborated with backend developers and designers to understand requirements, integrate APIs, test features, and resolve defects.
- Designed responsive websites using **Webflow** and created custom email templates using **Beefree**.
- Maintained code quality through peer code reviews using **GitHub** and followed reusable frontend development practices.
- Worked on improving the **usability, responsiveness, accessibility, and reliability** of application interfaces across different devices and browsers.

Aug'21 – Jan'22 | HTML Developer | Keynote Design Solutions
Key Result Areas:

- Crafted responsive web designs using **Bootstrap** and **CSS3** media queries to ensure seamless user experience
- Transformed **PSD** designs into fully **responsive HTML**.
